

# ZAP Timer™ Models 400, 800 & 1200

## Multi-Product/ Single Function Timers

ZAP TIMER™

### Eliminate the Guesswork

Instant timing for your grill, fryer, oven, mixer, holding bins, buffet line, or any station or process requiring a timing solution. Remove the guesswork as all your foods and processes are precisely grilled, cooked, baked or held.

### “Across-the-Kitchen” Viewing

The large, easy-to-read display allows the operator to check the product status at all times.

### Automatic Time Management

The ZAP Timer™ stores one program time per key allowing the user to track up to 12 countdowns or count-up times concurrently\*. The timer is offered in three models with 4, 8 and 12 product keys and is available in 120V or 240V.

- \* Model 400: 4 products/times
- Model 800: 8 products/times
- Model 1200: 12 products/times

### Simple To Program

Whenever the unit is idle, the programming mode may be entered by pressing the program key for 5 seconds and then selecting a product key. The up and down keys are used to set the time and, when held, will cycle rapidly. When done, the user either selects a new key or presses the program key to complete the process.

### Information At Your Fingertips

When idle, the ZAP Timer displays either “-:--” or counts up or down showing the product with the least amount of time remaining. A flashing LED above a product key signifies this cycle has the least amount of time remaining. If more than one timing cycle is active, the corresponding LEDs above the product keys are lit steadily. Pressing and holding the SCAN key will cycle through all active product keys.

### After the Sale Support

As with all Kitchen Brains® products, the ZAP Timers come with 24-hour assistance via toll-free phone 1-800-FASTRON.

*A low cost alternative to mechanical timers, the multi-product, single-function ZAP Timer™ is our most affordable quality control tool and can be used in conjunction with any appliance or menu type. Available in 4, 8 or 12 product configurations, crew members can simply press a product key and go!*

### Easy to Use

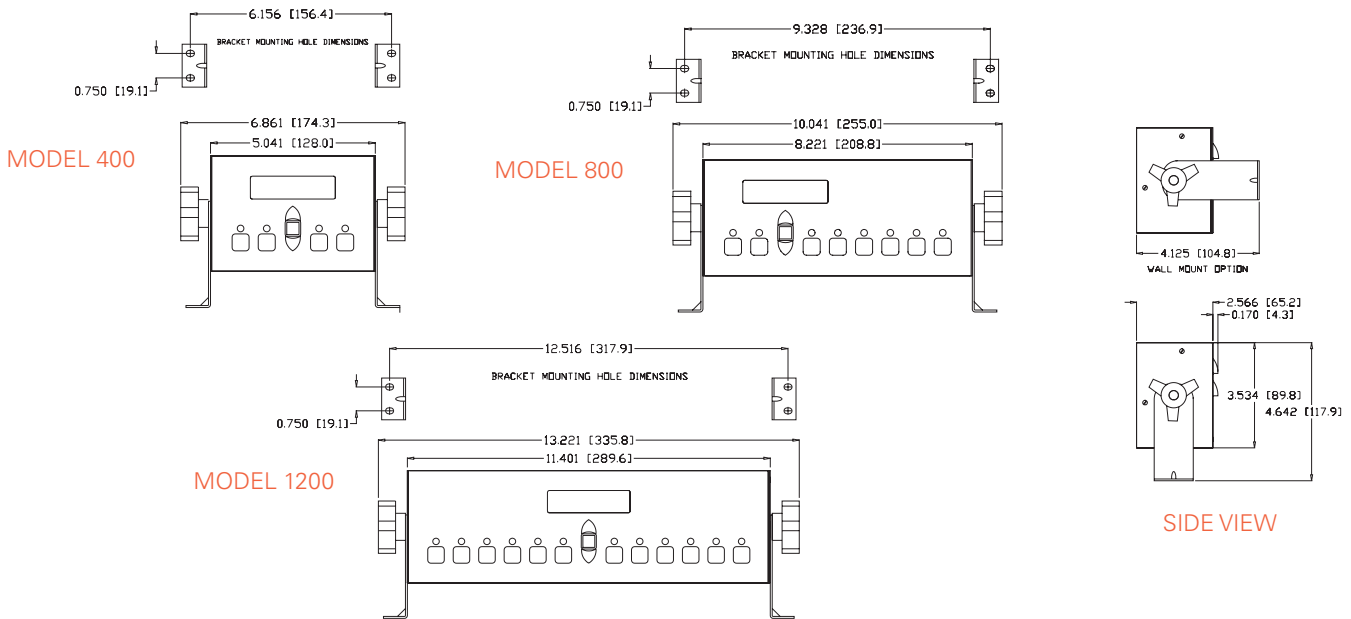

- Intuitive programming prompts
- Across-the-kitchen monitoring of time remaining and status
- View remaining time of all products
- Times can be programmed to count up or down from 1 second to 99 hours in either hours/minutes or minutes/seconds mode
- Easy to mount with universal mounting kit
- Pre-Alarms with adjustable beep patterns
- Ability to count up or down
- Three volume level choices

### Food Quality Improvements

- Remembers precise time of up to 4 products (Model 400), 8 products (Model 800) and 12 products (Model 1200)
- Electronic precision and durability
- Audible and visual done alarm (manual reset)
- Audible and visual pre-alerts for shaking, flipping, toasting, or any other activity requiring prompting.

# ZAP Timer™ Models 400, 800 & 1200

Multi-Product/Single Function Timers
